## ABOUT ME

Second-year BS Information Systems student with foundational knowledge in Java, Python, HTML, CSS, and JavaScript. Passionate about web development and aspire to be a Front-end Web Developer with a goal of being a full-stack developer. Organized, persistent, and able to handle being under pressure. Looking to leverage my self-taught skills and expand my knowledge by trying out new things.

## HAVE EXPERIENCE IN

### Languages

- Java
- JavaScript
- Python
- HTML
- CSS

### Libraries

- Tkinter

### Frameworks

- Java Swing

## PROJECTS

### User Information Manager Desktop App

March 2024 - May 2024

- Developed a Java desktop application as part of a final lab activity for an OOP subject.
- Utilized Java Swing to design the user interface, including a functioning login page.
- Implemented features to record, add, and remove data in a table format on the main page.
- Integrated functionality to export the recorded data into an Excel file.

### Physics Calculator Desktop Application

January 2023 - May 2023

- Developed a Python-based desktop application as part of a joint ICT and Physics project in Senior High School.
- Implemented various physics calculations, including displacement, distance, speed, velocity, energy (joules), and power.
- Designed the graphical user interface (GUI) using Tkinter.
- Worked collaboratively with one other developer to successfully deliver the project, enhancing teamwork and problem-solving skills in a coding environment.

## EDUCATION

### 2023 - 2027

University of Santo Tomas  
BS Information Systems

### 2021 - 2023

San Beda College Alabang  
STEM - Engineering

## TOOLS

- Figma
- GitHub
